Cape Town Energy Saving and Storage Project

Overview

What is Cape Town's energy strategy?

TY OF CAPE TOWN
FOREWORD FROM THE EXECUTIVE MAYOR
With this Energy Strategy, Cape Town is charting the long-term path to 2050, as we make the great transition from centralised supply of unreliable, costly and fossil fuel-based Eskom energy, to an increasingly decentralised supply of reliable, cost-effective, carbon-

How does Cape Town support decarbonisation of electricity?

ties and the City of Cape Town's Energy Strategy
THE KEY AREAS OF ALIGNMENT INCLUDE: Decarbonisation of electricity is evidenced through the City of Cape Town's delivery and support of new renewable energy sources (whether owned or procured by the City or from the private sector) to reduce the local grid emissions factor. This is.

What does energy security mean for Cape Town?

2050: Energy Security for a prosperous Cape Town. This vision is underpinned by four principles that describe the kind of energy system Cape Town needs – a resilient energy system that can provide reliable, affordable and carbon-neutral energy to everyone. It is a vision that is shaped by key shifts and stresses to be navigated, among a range of critical predictability factors.

Why should Cape Town invest in a load shedding system?

load-shedding, to alleviate energy poverty, and to optimise energy use across Cape Town. This will be backed by a future-fit municipal electricity service, proactive electricity infrastructure upgrades, and support for residents to
