Overview

What is a residential solar battery system in Cape Town?

A Residential Solar Battery System in Cape Town enables you to operate independently from the grid for 6 to 8 months of the year. It consists of Solar Panels, an Inverter and a Lithium Battery.

What is a solar battery storage?

A solar or PV panel is a frame with several connected solar cells. The more solar panels that are connected together means more electricity can be produced. This clean electricity from the sun can replace power from the national grid and to top it off you can install a solar battery storage to maximize the benefits of going solar.

Can you store solar power in a battery?

If your solar panels generate more solar power than your household can use, you can then store that extra electricity in a solar battery. This gives you the benefit of having power available when the sun sets or during load-shedding and rainy days. We do installations of any solar nationwide.
