Central Africa Backup Uninterruptible Power Supply

Overview

Can South Africans afford a fully-fledged backup power system?

South Africans who cannot afford a fully-fledged backup power system have a range of cheaper options available that can keep certain key appliances powered during load-shedding. Eskom has warned that load-shedding will likely be necessary throughout winter and recently implemented stage 4 load-shedding yesterday evening.

What is a ups power supply & how does it work?

Our UPS power supply provides protection from power surges, load shedding and unpredictable weather conditions. Uninterruptible Power Supply (UPS) ensures its internal battery gets constantly charged from the main electrical grid supply and delivers a steady, consistent electricity flow to any equipment or appliance plugged into it.

What is uninterruptible power supply?

Uninterruptible Power Supply protects your electricals from the adverse effects of brownouts, spikes and power outages. An uninterruptible power source or uninterruptible power supply is a power supply system responsible for providing emergency load in case of power failures.

Why should you choose Riello & pureline ups in Africa?

Along with internationally renowned Riello and Pureline state of the art UPS, STS, ATS and voltage regulator systems with ELITE batteries, give any UPS user in Africa, peace of mind and a trouble-free emergency power backup solutions with product guarantee options of up to 5 years.
