# Central Asia Industrial solar container battery Model

**ESS**

## Overview

---

The battery core adopts lithium iron phosphate battery-LFP 48173170E, the capacity is 120Ah, the nominal voltage is 3.2V, the working voltage range is 2.5~3.65V, the monthly self-discharge rate of the battery is  $\leq 3\%$ . What is a containerized battery energy storage system?

Containerized Battery Energy Storage Systems, or BESS, are modular, scalable energy storage solutions that integrate batteries, PCS, BMS, EMS, and thermal management within a standard container. They store energy from renewables or the grid and discharge it when needed, enabling peak shaving, load shifting, and grid support.

What are commercial energy storage systems?

What are commercial energy storage systems?

A commercial energy storage system allows facilities like businesses, industrial parks, charging stations and virtual power plants (VPP) to control how they use energy, set electricity prices and tackle blackouts in a flexible and smart way.

What is a containerized battery setup?

Whether for peak shaving, load shifting, or backup power, containerized battery setups deliver the scale and flexibility required for industrial and commercial energy needs. Advanced thermal management and safety systems ensure reliable performance in diverse settings.

Are commercial and industrial energy storage systems the future?

Among the most promising advancements is the deployment of commercial and industrial energy storage systems that not only enables a more resilient and flexible energy infrastructure but also enhances cost savings, energy independence, and sustainability outcomes for businesses and the grid.
