# Central Europe Northwest Liquid Flow Energy Storage Project

Energy storage(KWH)

**102.4kWh**

Nominal voltage(Vdc)

**512V**

—  
Outdoor All-in-one ESS cabinet

## Overview

---

How many energy storage projects are there in Europe?

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe.

What is the European energy storage inventory?

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the first European-level tool of its kind and offers energy storage data across a full range of technologies.

How does energy storage work in the EU?

The main energy storage method in the EU is by far 'pumped storage hydropower', which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example on a sunny or windy day - and releasing it when more energy is needed.

What are Europe's next-generation storage technologies?

Research institutions across Europe are developing next-generation storage technologies, including advanced flow batteries, compressed air energy storage, and hydrogen-based systems.

## Central Europe Northwest Liquid Flow Energy Storage Project

---

### Europe's largest flow battery project launched ...

18 June 2025: Construction work for the world's largest flow battery started this month at the strategic critical electrical grid interconnection point on ...

### STEPS

The STEPS project focused on energy storage and energy systems in North West Europe (NWE). Research and industry partners from various ...

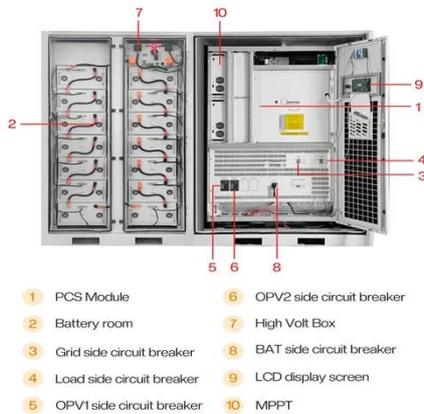

### 14 GW of energy storage capacity under ...

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy ...

## European energy storage: a new multi-billion-dollar asset class

What opportunities does energy storage offer for investors? With energy storage, there's a new and interesting asset class emerging, and the business model is fundamentally ...

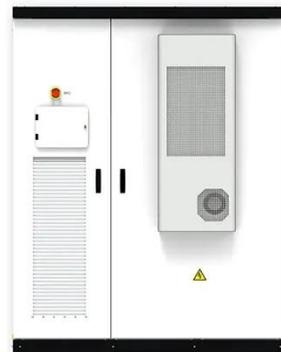

## Flow Battery Project Awarded Under the Innovation Fund

24 October 2024: 24 October 2024: Yesterday, the European Commission selected 85 innovative net-zero projects to receive EUR4.8 billion in grants from the Innovation Fund, supporting the ...

## 14 GW of energy storage capacity under construction in Europe

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe. A real-time ...

## The changing shape of European energy ...

What's the size and shape of the market? The European grid-scale project

pipeline is large and diverse. We looked at all storage ...

---

## Energy Storage in Europe

Note: Required spread for a two-hour battery project assuming revenues cover project costs of EUR360,000/MWh in 2024, for previous years assumes BNEF's Europe energy ...
