

BLINK SOLAR

China Solar Base Station Outdoor Site

LiFePO₄ Battery, safety

Wide temperature: -20~55°C

Modular design, easy to expand

Wall-Mounted&Floor-Mounted

Intelligent BMS

Cycle Life: ≥ 6000

Warranty: 10 years

Overview

China's first large-scale photovoltaic (PV) technology demonstration and validation base in deserts, including the Gobi and other arid areas, started operations on Friday in Otog Front Banner in the city of Ordos, north China's Inner Mongolia Autonomous Region, promoting the high-quality development of the country's PV industry, according to the State Power Investment Corporation. Can large-scale PV power plants be built in China's deserts?

The results show that the potential for large-scale PV power plants in China's deserts is significant, with 69.4 % of the region assessed as medium or higher.

Where is China's largest solar power plant located?

Once a coal mining site, the Otog Front Banner, Ordos in Inner Mongolia is now home to the Mengxi Blue Ocean Photovoltaic Power Station, China's largest single-capacity solar power plant. The facility is designed to generate 5.7 billion kilowatt-hours (kWh) of electricity every year, sufficient to power two million households.

Will China's blue ocean solar power station stop burning coal?

The Mengxi Blue Ocean Photovoltaic Power Station covers an area of 7,000 hectares (70 sq km) and is home to more than 5.9 million solar panels. By bringing this project online, China estimates that it will stop burning 1.71 million tons of coal every year and reduce its carbon emissions by 4.7 million tons.

Where is the Mengxi blue ocean photovoltaic power station?

Aerial view of the Mengxi Blue Ocean Photovoltaic Power Station in Gobi Desert. Once a coal mining site, the Otog Front Banner, Ordos in Inner Mongolia is now home to the Mengxi Blue Ocean Photovoltaic Power Station, China's largest single-capacity solar power plant.

China Solar Base Station Outdoor Site

Locating the suitable large-scale solar farms in China's ...

Current assessments of PV plant sites in deserts lack consideration of wind-sand hazards and ecological impacts. In this study, we have developed a new large-scale ...
