# Chisinau Solar Power Monitoring System

## Overview

---

How much solar power does Chisinau Moldova produce a year?

Seasonal solar PV output for Latitude: 47.0042, Longitude: 28.8574 (Chisinau, Moldova), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 6.44kWh/day in Summer.

What is continuous solar PV Monitoring?

Continuous Solar PV Monitoring: The system tracks key performance metrics like energy generation, voltage, temperature, and efficiency in real time, ensuring up-to-date data on solar panel performance.

Where is solar power produced in Moldova?

In Chisinau, Chişinău Municipality, Moldova, located at a latitude of 47.0042 and longitude of 28.8574, the generation of solar power varies significantly with the changing seasons due to its position in the Northern Temperate Zone.

How can a solar photovoltaic system be monitored?

The proposed approach involves regular adjustments to the voltage and current settings while continuously storing the latest data. This method facilitates convenient and straightforward daily or monthly monitoring of the solar photovoltaic system.

## Chisinau Solar Power Monitoring System

---

### Southeast Europe

After spending the day in Chisinau I headed back to Romania the next day. This time I took a minibus to the city of Iași, total driving time was about 6 hours (with about 2 of ...
