# Comparison of prices for ultra-high-efficiency Zambian photovoltaic folding containers

## Overview

---

Will Zambia increase its solar power capacity by 2030?

The Zambian government has set a target to increase its installed solar and wind capacity to 600 MW by 2030. However, the current installed capacity for solar photovoltaics is only 90 MWp, indicating significant underutilisation of Zambia's potential in the renewable energy sector.

Can battery storage be used with solar photovoltaics in Zambia?

The Zambian regulation foresees customs duty and VAT exemptions for most equipment used in renewable energy or battery storage projects. Detailed information is provided in In this section, we discuss the opportunity of battery storage in combination with solar photovoltaics from a financial point of view.

How much does a solar battery cost in Zambia?

Africa Clean Energy Technical Assistance Facility. (2022). Customs Handbook for Solar PV Products in Zambia. Bloomberg New Energy Finance. (2022, December 6). Lithium-ion Battery Pack Prices Rise for First Time to an Average of \$151/kWh.

Is Zambia a good country for photovoltaic energy?

The country's average daily PV electricity output ranges between 4.54 and 4.85 kWh/kWp, equating to average annual totals of 1658 to 17172 kWh/kWp from the country's six hydropower reservoirs. Indeed, Zambia is one of the countries with a high potential for photovoltaic energy generation; the following have been noted:
