Cost of using 20kW collapsible containers in Middle Eastern ports

Overview

Automatic container terminals (ACTs) have emerged as the development direction of upgrading and transformation for traditional manual container terminals. A number of terminal layouts are devised.

How efficient are container ports in South Asia and Middle East?

The number of studies available in the literature analyzing the efficiency of container ports in the South Asia and Middle East is very limited. Specifically, for Pakistani ports there have been no such study which could evaluate their technical efficiency.

Which container ports are the most efficient?

In comparison, looking at the efficiency results of the South Asian and Middle Eastern container ports, only two ports are efficient. The efficiency of the Jebel Ali is for the reason that it is one of the prominent ports of the region and serves as a main hub for the UAE's shipping business.

What is the percentage of efficient ports in East Asia?

As compared to East Asian ports, the percentage of the efficient ports in South and Middle East is 13.33% as only two ports out of 15 are efficient, which is much lower. While the percentage of inefficient ports is higher with a value of 86.67% with 13 container ports being inefficient.

How much does a 40ft container cost?

A 40ft standard container from China to the US West Coast costs \$3,500-\$6,000. Shipping to the East Coast ranges from \$4,500-\$7,500. These rates include base ocean freight and surcharges but not destination charges, customs clearance, or inland transportation. High-demand periods can push rates 30%-50% higher.
