Dakar Hybrid Power Station

Overview

When did Senegal get a power station?

The international tender for the Sendou power station was launched on 18 November 2005. The agreement between the Minister of Energy of Senegal and the Director General of Senelec (Société nationale d'électricité du Sénégal) on one side and Nykomb Synergetics on other side was signed on 24 January 2008 in Dakar.

When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

Will Cap des Biches CCPP be the largest power plant in Senegal?

Once operational, the Cap des Biches CCPP will be the largest power plant in Senegal. Credit: Photo smile/Shutterstock.com. The Cap des Biches combined-cycle power plant (CCPP) is currently under construction in Senegal. It will be Senegal's first combined-cycle power plant and is set to become the largest power plant in the country.

What is Senegal's first combined-cycle power plant?

It will be Senegal's first combined-cycle power plant and is set to become the largest power plant in the country. The project's development is headed by West African Energy, which holds an 85% stake, and Société Nationale d'Électricité du Sénégal (Senelec), the national electricity utility company, with a 15% share.
