Danish energy storage container sales

Overview

Why does Denmark need a gas storage facility?

This requirement was introduced as part of the joint European effort to strengthen energy supply and was adopted in the wake of Russia's invasion of Ukraine. As of 1 July 2025, Denmark's two gas storage facilities were approximately 33 percent full, and only around 40 percent of the storage capacity had been booked at that time.

What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

Will Denmark meet the EU gas storage target ahead of winter 2025-2026?

Find out more about Denmark's approach to meeting the EU gas storage target ahead of winter 2025-2026. EU legislation on the security of gas supply requires that member states with underground gas storage facilities ensure that these are 90 percent full ahead of the winter season.
