Delivery time of the 500kWh mobile energy storage container

Overview

What is A 500KW Megatron battery storage system?

500kW MEGATRON - 20 foot Containerized Commercial Battery Energy Storage System designed to for On-Grid and Renewable Energy Projects.

How can a container be used for energy storage?

Containers can be placed together to create even larger energy storage banks (1MW with 2, 1.5MW with 3 etc.) One of the largest energy storage battery systems available! Every solar storage system requires an effective battery bank that can help in storing the energy and using it to the utmost later on.

How much does an energy storage system cost?

20 Year Design Life The energy storage system is essentially a straightforward plug-and-play system which consists of a lithium LiFePO₄ battery pack, a lithium solar charge controller, and an inverter for the voltage requested. Price is \$387,400 each (for 500KWH Bank) plus freight shipping from China.

What voltages are available for a battery energy storage system?

All system systems are offered with either 400VAC or 480VAC 3 phase interconnect voltages. Each commercial and industrial battery energy storage system includes Lithium Iron Phosphate (LiFePO₄) battery packs connected in high voltage DC configurations.
