

BLINK SOLAR

Dili sine wave inverter

LiFePO₄

Wide temp: -20°C to 55°C

Easy to expand

Floor mount&wall mount

Intelligent BMS

Cycle Life:≥6000

Warranty :10 years

Overview

This product is a pure sine wave inverter with the same output waveform as the mains (power grid). It is designed using microcomputer SWPM sine modulation technology and miniaturization. What is a pure sine wave inverter?

A pure sine wave inverter is a device that converts DC power from a battery into AC power, allowing you to charge almost any household appliance or electronic device off-grid.

How does a sine inverter work?

A sine inverter takes the DC output of your solar array, converts it to AC, and does so in a way which replicates as closely as possible the pure sine wave of grid power alternating current. Moreover, pure sine wave inverters amplify the converted current to differing strengths of wattage and voltage.

How do I choose a sine wave inverter?

When selecting a sine wave inverter, it's crucial to consider the power requirements of your appliances and the energy source. A power output rating that matches your total power requirement, coupled with the right input voltage for your DC source, will ensure a reliable and efficient system.

Which appliances need a pure sine wave inverter?

Some appliances also require a Pure Sine Wave to run properly, including: digital clocks, light dimmers, variable speed motors, battery chargers, and audio/visual equipment. Because of their higher qualities, Pure Sine Wave inverters represent a more expensive purchase choice.
