Overview

How should batteries be stored?

Manufacturer instructions: Always refer to the manufacturer's instructions on the best/safest way to store batteries and adhere to their guidance. Storage Temperature Range: Batteries should be stored in a cool, dry place, ideally at room temperature.

How do you store half-used batteries?

When you take half-used batteries out of seasonal devices like holiday lights or camping gear, store them in a way that keeps them separate from unused batteries to avoid confusion. It also helps if new batteries are left in their original packaging. Speaking of which.

Is it safe to store lithium batteries at home?

Storing lithium batteries at home can be safe if you follow key precautions. Firstly, avoid extreme temperatures. Keep the batteries in a cool, dry place away from heat sources and direct sunlight. This helps prevent overheating and potential fire hazards.

Should a battery be fully charged during long-term storage?

During long-term storage, batteries should never be continuously charging, nor should they be fully charged or fully discharged. The rationale for each is as follows: Continuously charging: Battery failure is most likely to occur during charging. Continuously charging over long periods of time greatly increases the risk.
