Overview

Can flow battery energy storage be integrated with KW-MW-class vanadium flow battery?

Shanghai Electric Energy Storage in flow battery manufacturers in China has successfully developed 5kW/25kW/32kW series stacks, which can integrate kW-MW-class vanadium flow battery energy storage products. Up to now, more than 30 kW-MW level flow battery energy storage projects have been successfully implemented.

What is a flow battery?

Flow battery is a kind of unique electrochemical energy storage technology, which realizes the storage and release of electrical energy through the change of valence state of ions in the electrolyte. Among them, the vanadium redox flow battery is the most mature flow battery technology and has entered the stage of industrialization.

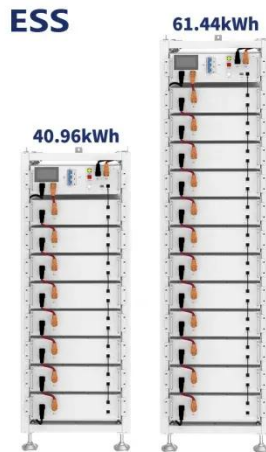

Who makes vanadium redox flow batteries in China?

V-LIQUID in flow battery manufacturers in China has been engaged in the R&D and production of vanadium redox flow batteries since 2016, and the complete integration of new energy power generation such as photovoltaics. The vanadium redox flow battery developed and manufactured by V-LIQUID has the following technical characteristics:

Who is the best flow battery manufacturer in China?

One of the top 10 flow battery manufacturers in China, HBIS has researched and prepared high-purity and high-performance vanadium redox flow battery electrolyte with low impurity content, high product stability and low production cost, and has developed more than 10 mature processes.
