

## **BLINK SOLAR**

# **Does solar power generation in Cebu Philippines need energy storage**

## Overview

---

How much solar power does Cebu City have?

Seasonal solar PV output for Latitude: 10.3099, Longitude: 123.893 (Cebu City, Philippines), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 5.62kWh/day in Summer.

Is Cebu a good location for solar power generation?

Cebu City, Central Visayas, Philippines (latitude: 10.3099, longitude: 123.893) is a highly suitable location for solar power generation due to its consistent sunlight exposure throughout the year and distinct wet and dry seasons rather than the traditional summer or winter experienced in other parts of the world.

Can solar energy be an alternative energy source for Cebu?

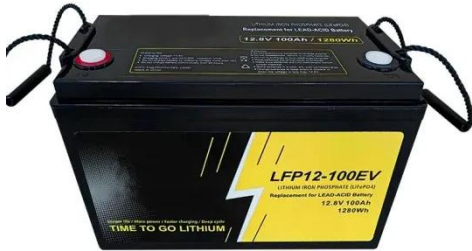

On the other hand, Solar energy can also be an alternative energy source for Cebu. The region's leading power distributor Visayan Electric Company (Veco) stated that though they are still using coal and some fossil fuel, 50% of their electric supply now comes from renewable energy.

How should solar panels be positioned in Cebu City?

In Autumn, tilt panels to 17° facing South for maximum generation. During Winter, adjust your solar panels to a 26° angle towards the South for optimal energy production. Lastly, in Spring, position your panels at a 4° angle facing South to capture the most solar energy in Cebu City, Philippines.

## Does solar power generation in Cebu Philippines need energy storage

---

### Cracking the Code on Solar and Storage in ...

The Philippines has made significant progress on renewable policy--but unleashing solar and storage at scale will take more than ...
