

## **BLINK SOLAR**

# **Does the inverter have 400w power**

## Overview

---

What devices can run a 400 watts power inverter?

A 400 watts power inverter can comfortably run a small laptop (rated 50 watts), a wall fan (45 - 60 watts), and a 32" CRT TV (120 watts). Your calculator should read 230 watts (50+60+120).

Why should you buy a 400 watt inverter?

It gives you super freedom & the ability to charge up your house/office equipment & other personal items of your vehicle. With 400 power watts inverter, you can enjoy a lot of advantages. For example, it can run a small television, refrigerator, tablets, laptop, power tools, cameras, DVD player, etc.

How many amps does a 400 watt inverter draw?

Even your 400 watt machine will draw around 40 amps. You need wires that can carry 40 amps from the battery to the inverter without dropping more than half a volt or so. Put a voltmeter across the 12 volt input posts on the inverter. Turn on your smaller 1.5 amp load. The 12 volts should not drop by more than a tenth of a volt.

## Does the inverter have 400w power
