Does the refrigerated container have a generator

Overview

Should you rent or buy a generator for a refrigerated shipping container?

A commercial generator for your 20ft or 40ft refrigerated shipping container will give you the protection and peace of mind you need. But how do you know which one to pick?

We'll discuss the important factors you need to consider whether you rent or buy a generator for your reefer containers. What is a refrigerated shipping container?

.

What is a genset generator?

What Is a Genset?

A genset, short for generator set, is a portable power unit that supplies electricity to refrigerated containers (reefers). These containers require a constant power source to maintain internal temperatures within the desired cold or frozen range.

Do reefer containers need a genset?

The short answer is yes, but only under certain conditions. If the reefer container is stationed at a port or warehouse where it can plug into an external power supply, a Genset isn't required. However, for transport across land or during long sea voyages without access to external power, a Genset becomes indispensable.

What are the different types of Genset units used for reefer containers?

There are three main types of genset units used for reefer containers: clip-on gensets, under-mount gensets, and on-chassis gensets. Each type serves specific purposes based on transportation needs and logistical requirements. Clip-on gensets are portable units that attach directly to the front or chassis of

the reefer container.

Does the refrigerated container have a generator
