# Duge solar Power Generation System

## Overview

---

What is Duke Energy powerpair SM?

CHARLOTTE, N.C., Ap/PRNewswire/ -- Duke Energy (NYSE: DUK) is implementing PowerPair SM, a new incentive-based pilot program for installing home solar generation with battery energy storage in its Duke Energy Carolinas and Duke Energy Progress service areas in North Carolina.

Why is Duke Energy partnering with powerpair?

"PowerPair gives Duke Energy an added tool to provide more reliability to solar energy which in turn benefits all customers as North Carolina grows in population," said Lon Huber, Duke Energy senior vice president, Pricing and Customer Solutions. "And by participating, customers are helping to support the state's clean energy goals."

How many customers does GE Energy serve?

The company's electric utilities serve 8.4 million customers in North Carolina, South Carolina, Florida, Indiana, Ohio and Kentucky, and collectively own 54,800 megawatts of energy capacity. Its natural gas unit serves 1.7 million customers in North Carolina, South Carolina, Tennessee, Ohio and Kentucky.

Can a dish-type solar concentrator increase power generation?

The findings from four control groups and outdoor experiments conducted over eight days demonstrate that. The installation of dish-type solar concentrator, greenhouse cavity, radiative cooling panel, and radiative cooling aggregator can significantly increase the power generation compared with the original TEG setup.
