EU Energy Batteries and Energy Storage

Overview

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

Should battery energy storage systems be regulated in Europe?

EU Regulations for Battery Energy Storage Systems: Battery Energy Storage Systems (BESS) are at the heart of Europe's clean energy transition. By storing renewable electricity, they stabilize grids, reduce fossil fuel dependency, and enable smarter energy management. But with great opportunity comes strict regulation.

What is the battery storage Europe platform?

The Battery Storage Europe Platform brings together industry leaders representing the battery storage value chain to advance the business case and regulatory frameworks for battery storage across the EU. Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness.

Why is battery storage so important in Europe?

Markus Elsaesser, the CEO of Solar Promotion GmbH (he/him), said: "Europe's solar success has laid the foundation - now battery storage is stepping into its pivotal role. With solar power surging across the continent, the need for flexible capacity has never been clearer, and batteries are ready to deliver."

EU Energy Batteries and Energy Storage

Funding for European energy storage startups reaches EUR2.14 ...

European energy storage hardware startups have raised over EUR2.14 billion in total equity funding, covering commercial, industrial, and grid-scale applications. According to new ...

EU needs a tenfold boost in battery storage by 2030

Daemers: "We hope that these two reports, adopted with wide majorities, will trigger action from the European Commission to incentivise the massive deployment of battery ...
