EU goes to work on solar panels

Overview

What is the EU doing about solar energy?

The EU is also cooperating with the International Solar Alliance to disseminate its experience in solar energy technologies, policies and practices. With the International Energy Agency, the EU will also prepare zero-emission energy roadmaps for just and socially fair transitions in countries dependent on coal.

5. Conclusions.

Is the EU ready for solar energy?

The EU has long been a front-runner in the roll-out of solar energy. Under the European Green Deal and the REPowerEU plan, solar power is a building block of the EU's transition to cleaner energy. Its accelerated deployment contributes to reducing the EU's dependence on imported fossil fuels.

How much solar power does the EU have in 2024?

Source: SolarPower Europe The EU solar generation capacity keeps increasing and reached, according to SolarPower Europe, an estimated 338 GW in 2024. The EU has long been a front-runner in the roll-out of solar energy. Under the European Green Deal and the REPowerEU plan, solar power is a building block of the EU's transition to cleaner energy.

How does Europe support solar power expansion?

Together with the European Data Journalism Network, DW has analyzed how Europe's governments support the continent's solar power expansion. How did solar become so popular so fast?

Today, several EU countries host a capacity of around a kilowatt — roughly two solar panels — per person.
