Environmental project using 100-foot Libreville collapsible shipping container

Overview

Are eco-friendly cargo shipping containers a viable solution?

Traditional shipping containers, typically made from energy-intensive materials like steel and aluminum, not only leave a substantial carbon footprint but also pose challenges in terms of waste disposal and recyclability. As the industry evolves, a promising solution emerges in the form of eco-friendly cargo shipping containers.

What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. It's practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

What is compact containers?

Compact Containers serves the global shipping and intermodal industry with an efficient, low-cost means to transport containers by Road, Rail, or Sea. Discover the future of cargo logistics with Compact Containers. Our SeaFold 40' collapsible containers redefine efficiency & cost savings.

Should a container be collapsible vertically?

Collapsing vertically has its benefits, but strength is not one of them. Given the requirement to position containers anywhere on a vessel, the industry must be confident that a collapsible container can sustain the weight of fully laden boxes both at sea and in the port.
