Eps battery storage cabinet

Overview

What is a B2U EPs cabinet?

large-scale grid-connected energy storage systems without incurring repurposing costs. B2U's EPS cabinet enables plug and play reuse of EV battery packs without incurring repurposing costs. Cabinets are designed to electrically and mechanically integrate 2nd life EV battery packs from a variety of EVs while achieving required UL9540 certification.

How do energy storage cabinets work?

Each cabinet is assembled and tested before being shipped directly to an ESS (Energy Storage System) project site where the cabinets can be rapidly installed and integrated into a functional energy storage system. Batteries are connected in series and then parallel to increase both voltage and capacity simultaneously.

What is an EPS cabinet controller?

Each EPS Cabinet Controller (ECC) manages the charging, discharging, connection and disconnection of battery packs. With real time monitoring, the EPS cabinet controller ensures batteries operate within guardrail settings. The controller manages climate control and hazard detection in each cabinet.

How many kWh are in a battery storage container?

Each battery energy storage container unit is composed of 16 165.89 kWh battery cabinets, junction cabinets, power distribution cabinets, as well as battery management system (BMS), and the auxiliary systems of distribution, environmental control, fire protection, illumination, etc. inside the container; the battery container is 40 feet in size.
