Estonia Communication Tower Base Station Construction Project

Overview

Where is Rail Baltica in Estonia?

The construction of Rail Baltica in Estonia has reached a significant milestone – construction contracts now cover half of the mainline, extending from Ülemiste Station to Tootsi in Pärnumaa.

When will active construction start in Estonia?

Active construction will start once all plans are approved. The procurement process was supported by Estonian consultancy BrainTeam OÜ and Finnish firm Vison Oy. Two international consortia have been selected for the construction of Rail Baltica's mainline in Estonia.

How many kilometres of new railway track will be built in Estonia?

In Estonia the project will involve the construction of a total of 213 kilometres of entirely new European gauge (1,435mm) railway track, with completion expected by 2030. "I am delighted that Sweco has been selected to contribute to this important project, linking the Baltic nations to the rest of Europe.

Will Rail Baltica create a continuous rail corridor between Tallinn and Warsaw?

This moves Rail Baltica closer to its goal of creating a continuous rail corridor between Tallinn and Warsaw by 2030. Selected Consortia: Part 1: GRK Eesti AS, GRK Suomi Oy, Aktsiaselts Merko Ehitus Eesti, NGE CONTRACTING, Sweco Finland Oy, Sweco Sverige AB, TSO SAS.
