What is armatherm FRR thermal break material?

Armatherm™ FRR thermal break material is typically used in conjunction with: Curtain Wall Mullions. Armatherm™ 500 structural thermal break material reduces heat flow within a building's thermal envelope reduces energy consumption as well as potential condensation issues.

What is a structural thermal break?

Farrat Structural Thermal Breaks are the most efficient & reliable way to thermally separate structural connections and prevent heat loss in the building envelope. Proven to improve building performance and reduce energy loss throughout the lifetime of the building.

Where are Farrat structural thermal breaks used?

Farrat Structural Thermal Breaks are used in over 15,000 projects worldwide and growing , across different sectors. We would like to become your trusted supplier here in Ireland.

What are the benefits of a thermal break?

The primary benefit of this is that the thermal break will maintain full structural integrity with very limited creep under load while reducing heat loss.
