# **Financing for a 20kW Solar Container in Africa**

## Overview

---

Is a 20kW Solar System a good investment in South Africa?

Solar energy has become a popular choice for homeowners and businesses in South Africa, especially as the cost of solar systems has decreased in recent years. A 20KW solar system is a significant investment, and it's essential to have a comprehensive understanding of the costs and factors that affect the price.

How much does a 20kW Solar System cost?

You're probably wondering why 20kW solar system quotes vary so dramatically. Well, let's cut through the noise – prices in 2024 range from \$42,000 to \$65,000 before incentives. But here's the kicker: system configuration and local regulations account for 60% of cost differences. Wait, no – actually, battery storage isn't included in those numbers.

How much does a solar system cost in South Africa?

In May 2024, the upfront cost of installing a solar power system in South Africa would set you back approximately R150,000 to R350,000 for a small project and up to R3.5 million for a 100kW system.

How much solar capacity is installed in Africa in 2024?

Published in partnership with RMI and supported by GET.invest, this report serves as a key reference for policymakers, investors, and industry professionals seeking insights into Africa's evolving solar sector. 2.4 GW of new solar capacity was installed in Africa in 2024.
