# Financing for a 350kW Foldable Container Project for Tourist Attractions

## Overview

---

Are foldable containers effective in repositioning empty containers?

Foldable containers are considered an effective solution to deal with the endemic imbalance in the repositioning of empty containers. Several foldable containers were commercialized without clear breakthrough in the market and most current researches are still limited to small pilot projects.

What are portable container homes?

Portable container homes, also known as prefab shipping container homes, house sheds, tiny foldable houses, or container houses. These innovative dwellings offer an array of advantages, making them an appealing alternative to traditional housing.

Are foldable containers economically viable?

In order to examine the economic viability of the developed foldable container as compared to a standard 40-ft high-cube container, cost analysis is performed for an example route, i.e., the Busan-Vostochny-Moscow route (Fig. 10), which involves both inland and maritime transportation.

When will a foldable container be rentable?

With regard to the return on investment as compared with the standard container, this means that the foldable container may potentially start to be rentable after 4 round trips when its purchase price is US\$ 20,000 and two round trips when its price is US\$ 10,000.
