How does the fcps-24fs6 work?

When installed at the end of a NAC wire run, the FCPS-24FS6 can track (i.e. “follow”) the strobe synchroni-zation timing pulses on the existing NAC wire run. This maintains the overall system flash timing of the additional strobes attaches to the FCPS.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

Can a 240V inverter run a solar panel?

No. This kit comes standard with 120V output. So it cannot run 240V appliances the way it is. That said, you can add another inverter in the future to get 240V output. We include pre-drilled frames on the solar panels along with standard z-brackets to make mounting the panels to the structure of your choosing as easy as possible.

Are off grid solar containers reliable?

Solar equipment is very reliable but occasionally parts may fail so there is need to monitor and solve any problems. Off Grid Solar container units guarantee security and reliability and allow the engineering team to complete installations in a few days rather than weeks.
