Folding Container DC Power Supply for Tourist Attractions

Overview

How many power supplies can be mounted in a 40ft container?

Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery. Depending upon specifications, containerized power supplies may be stacked, or located side-by-side. Setup and testing or shut-down and packing can be achieved within a matter of days.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.

What types of power supplies can be provided?

A wide range of high voltage, CW DC, pulsed or modulated waveform outputs can be provided. The entire system is made to be entirely weatherproof. Power supplies <300kW can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery.

Why should you choose AMPEGON for a self-contained power supply system?

To address these challenges, Ampegon has developed solutions to provide flexible self-contained power supply systems. Whether there is insufficient space inside existing buildings for a new power supply, no building exists, or there's a need for a system to be continuously mobile, Ampegon has experience providing such solutions.
