Grenada uninterruptible power supply ups

Overview

What is an uninterruptible power supply (UPS)?

An uninterruptible, or uninterruptible power supply (UPS) works as a battery, surge protector and power inverter for household and office electronics. The battery inverter allows stored energy to be used for power, while the surge protector prevents any damage from a sudden surge in the power level.

How long does a UPS battery last?

A UPS battery can provide backup power from anywhere between two and 20 minutes or longer, depending on the number of devices connected and the amount of load on the computer's CPU. A battery for UPS allows users to save data, files and any other information before safely powering down equipment in the event of power loss.

How many volts does a UPS backup use?

Most UPS backup models will indicate their particular volt-amperes (VA) output. The higher the VA rating the more stored power and running capacity available. For single devices and smaller operations, 200 to 450 volt-amperes will generally suffice. Need more power?
