## Overview

---

Will China's first offshore photovoltaic project be a model for global expansion?

Global Times The initial power units of China's first 1-gigawatt offshore photovoltaic project have been connected to the State Grid, said the State Power Investment Corporation on Wednesday. This project marks a significant step forward, serving as a model for the global expansion of offshore solar energy.

Will China's offshore PV project reach 60 gigawatts by 2027?

The document called for the integrated and multi-dimensional development of offshore PV projects. China's offshore PV installed capacity is projected to surpass 60 gigawatts by 2027, according to a statement from China Forward Industry Research Institute Co, a Hong Kong-based industry research firm.

Is Uzbekistan's 1 GW PV project fully connected to the power grid?

The 1 GW photovoltaic (PV) project in Uzbekistan, the largest PV project by Chinese-funded enterprises in Central Asia, was fully connected to the power grid on June 28, local time.

How big is China's offshore PV installed capacity by 2027?

China's offshore PV installed capacity is projected to surpass 60 gigawatts by 2027, according to a statement from China Forward Industry Research Institute Co, a Hong Kong-based industry research firm. Global Times
