HTC base station does not respond when plugged into power source

Overview

Why are my Vive lighthouse base stations not waking up?

If your Vive Lighthouse base stations won't wake up from standby, try this: Unplug the base stations and then plug them back in again. This means the base stations are having difficulty seeing one another. Try moving anything that may be blocking the Vive base stations. Including yourself.

Why is my Vive base station not working?

Make sure that the base stations are tilted at an angle that lets them see each other and the play space. If the LED on the Vive base station is not lit up, that means the base station is not receiving power. If the base station is plugged into an outlet but not powering on, try a different outlet.

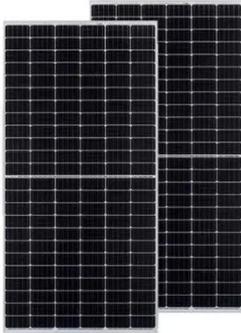

What are some common HTC Vive problems?

HTC Vive – the “king of virtual reality” – does just that, but the VR system comes with its drawbacks. From “headset not found” errors to pairing issues, we'll cover common HTC Vive problems users face. Then, we'll suggest possible fixes and provide step-by-step instructions on how to address the issues you might encounter with your HTC Vive.

Why is my HTC Vive not working?

If the HTC Vive is powered on and all cables are properly connected, the motherboard in the device may have malfunctioned. The malfunction can be caused by a factory defect or as the result of an electrical short. For steps on how to replace the headset's motherboard, please refer to the Motherboard Replacement Guide.
