# High quality magnetic breaker in Moscow

## Overview

---

What type of circuit breaker should be used in Russia?

Guideline: For residential single-phase systems in Russia, 1P or 2P breakers are standard. For industrial three-phase installations, 3P or 4P configurations are typical. The operating environment significantly affects the performance and lifespan of a circuit breaker.

Who is the Russian distributor of magnetic materials?

Since 2000, the company has been an authorized Russian distributor of the products of the Arnold Group, the world's largest producer of magnetic materials.

What are Russian molded case circuit breakers?

Russian Molded Case Circuit Breakers (MCCBs) are designed for medium-capacity circuits in industrial and commercial power systems. These breakers offer adjustable trip settings and are available in 3-pole and 4-pole configurations, making them ideal for complex electrical installations.

What are Russian circuit breakers made of?

Russian circuit breakers commonly use high-purity copper or silver-copper alloys to maximize electrical conductivity and minimize resistive heating. In premium models—particularly air circuit breakers and high-capacity molded case breakers—contacts are often silver-plated.
