

**BLINK SOLAR**

**High quality solar power  
satellite factory company**

## Overview

---

How big is the satellite solar cell materials market?

The satellite solar cell materials market is projected to reach USD 96 million by 2030, at a CAGR of 13.7% from USD 44 million in 2024. Demand from driving factors like space exploration plays a pivotal role in fueling the satellite solar cells market.

Who are the top 10 satellite manufacturers?

These major players will continue to set the standard as the need for satellites increases. The top 10 players in the satellite manufacturing industry include SpaceX, Airbus, Boeing, Lockheed Martin, Northrop Grumman, Raytheon Technologies, ISRO and more.

Who is SpaceTech GmbH?

SpaceTech GmbH is a German company focused on advancing space-based solar power (SBSP) technology. Founded with the mission to harness solar energy from space, the company develops innovative solutions for transmitting solar power via satellites to Earth.

How does space exploration affect satellite solar cells market?

Demand from driving factors like space exploration plays a pivotal role in fueling the satellite solar cells market. The demand for sophisticated technologies, such as satellite solar cells, arises from the necessity for efficient power generation in space missions.
