

Overview

What is a portable power station?

A solar generator is a portable power station that supports solar panel input. They are often used interchangeably, but not all power stations come with solar panels. How long does a portable power station last during an outage?

Run time depends on capacity and load.

What is the best portable power station for home backup?

Key Details: Need something that grows with your power needs?

The Jackery Explorer 2000 Plus kit is hands-down the best expandable portable power station for home backup. The base unit plus one expansion battery already delivers over 4kWh, and serious users can push that all the way up to 24kWh with parallel stacking.

What makes a good solar power station?

One of the most important aspects of any solar power station is how well it can interface and charge from various types of solar panels. In some cases, a solar power station might not be able to accept different types of solar panels or may be locked to its own brand's solar panels through a proprietary connection.

Is a 100W solar power station a good choice?

A new compact power station by an upcoming brand with bigtime battery experience. Our favorite aspect is the fast AC charging combined with >20ms UPS transfer time. The 100W solar charging matches the top brands. Although testing is limited and brand recognition still has a long way to come, this may be a real contender.
