

## BLINK SOLAR

# Honduras 100 million kWh of energy storage power

### System Topology

## Overview

---

How much energy does Honduras use?

The total primary energy consumption in Honduras is around 4.62 Mtoe or 53,730.6 GWh.

Where is the electricity system concentrated in Honduras?

The national electricity system is concentrated in the western part of Honduras. In absolute terms, it is estimated that more than 386,000 households or more than 1.93 Million people in rural areas remain without access to electricity, with the sparsely populated eastern part remaining mainly beyond economic line-extension distances.

How much energy did Honduran households use in 1987?

In 1987 Honduran households consumed approximately 60 percent of total energy used, transportation and agriculture used about 26 percent, and industry used about 14 percent. Food processing consumed about 50 percent of industrial sector energy, followed by petroleum and chemical manufacturing.
