# How long does it take for solar energy storage to pay back

## Overview

---

How long does it take a solar system to pay off?

The average solar payback period for EnergySage customers is currently just over seven years. However, without the federal tax credit, that same system would take over 10 years to pay for itself. Here's what you need to know about how long it's likely to take you to break even on your solar energy investment—and why timing matters.

How long does solar payback last?

Payback periods vary significantly by state, depending on the availability of incentives, the cost of solar, and the cost of electricity. Remember: Solar payback periods will extend 43% longer—or up to 8 years—starting Janu, when the federal solar tax credit disappears.

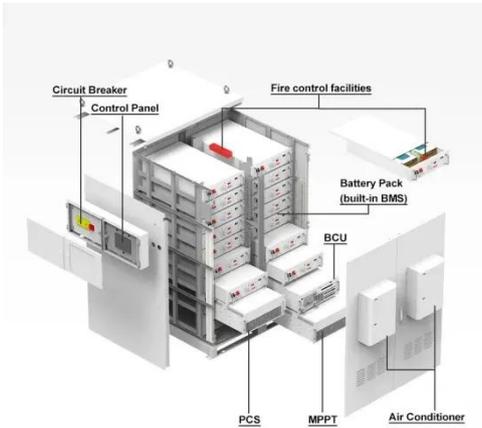

Do you need a payback period for solar?

With a solar loan or a lease or PPA, you often don't need to provide any cash upfront. While you'll save less money in the long run by paying for solar with a loan or lease, assuming your monthly solar payments are less than what you currently pay for electricity, you won't have a payback period.

How do I calculate my solar payback period?

To calculate your solar payback period, divide your combined costs by your annual savings. With tax credit: Combined costs (\$18,552) ÷ annual savings (\$2,613) = solar payback period (7.1 years) Without tax credit: Combined costs (\$27,360) ÷ annual savings (\$2,613) = solar payback period (10.5 years)
