# How many degrees does the shaking light battery cabinet have

## Overview

---

What is the battery capacity of a shake light 40-B rechargeable flashlight?

Battery = NiMH, 3.6V, 40mAh. Rated at 10,000 charges. The brand name Shake Light 40-B Rechargeable Flashlight is a quality LED shake flashlight manufactured by EcoCentricNow LLC. Since 1997, we have manufactured shake flashlights as an alternative to “primary” battery powered LED lights.

Does a shaking flashlight need a battery?

So the battery required does not have to be very large. This shaking flashlight does just that! Here is a very bright torch that never needs a battery. It can be quickly recharged by shaking and provides light for up to 30 minutes. To be so effective, a very powerful magnet is needed to transfer lots of energy from each 'shake'.

What is a shake light 40 B?

Shake Light 40-B Magnetic Induction Flashlight. Compact size, zero maintenance Faraday flashlight. Projects a collimated beam that illuminates objects 35+ feet away. SL40-B is perfectly suited for individuals who enjoy camping, backpacking, and hunting.

What is a shake to charge flashlight?

Our shake flashlights provide best in class performance and reliability. SL40-B shake to charge flashlight incorporates a magnetic charging system, which generates electricity stored in a 3.6v rechargeable NiMH battery. As the rare earth magnet passes through the copper wire coil the battery charges. Providing up to 2 hours of continuous light.

## Simple Faraday Flashlight - Circuit Diagram and Working

Construction Details  
Circuit Diagram  
The Design  
Calculating The Induced Voltage  
The principle used in this flashlight design was first discovered by Michael Faraday, when he proved that when a magnet was moved within a coiled conductor, electricity was generated in the conductor. The same concept is implemented in this design wherein a magnet is rapidly moved within a copper coil forcing electrons to flow through the wire and g See more on homemade-circuits Cyberphysics
