# **How many mobile power packs can a train carry**

## Overview

---

Can a passenger carry a power bank without a 3C Mark?

2. According to the relevant regulations of the Civil Aviation Administration of China, starting from J, passengers are prohibited from carrying power banks without 3C marks, with unclear 3C marks, or of recalled models or batches on domestic flights.

How much weight can you carry on a train?

The free weight allowance for train travel can vary depending on the specific ticket type you have purchased. The baggage size allowance for train travel can vary depending on the train service. However, the weight of a single box or bag cannot exceed 20 kilograms (44 pounds). The total of the three dimensions cannot exceed 130 cm (51 inch).

Should you charge your phone on a train?

There's no rule against it and many locals do the same. You'll see people charging phones nonstop on long rides. Some train seats have USB ports, but not all of them work well. That's why it's smart to bring your own charger. A 20000mAh power bank will keep your phone going all day. There's no staff checking your charger, unlike airports.

How many spare batteries can a passenger carry?

They approve the carriage of more than 15 PED. Each person is limited to a maximum of 20 spare batteries of any type. The operator may accept electronic devices (PED) containing batteries, which may include electronics such as cameras, mobile phones, laptops and tablets containing batteries, when carried by passengers for personal use.
