

## BLINK SOLAR

# How much does wind power for solar container communication stations cost per square meter

## Overview

---

How much does a distributed wind energy system cost?

The residential and commercial reference distributed wind system LCOE are estimated at \$240/MWh and \$174/MWh, respectively. Single-variable sensitivity analysis for the representative systems is presented in the 2019 Cost of Wind Energy Review (Stehly, Beiter, and Duffy 2020). Analysts included the LCOE estimate for a large distributed wind energy.

Who provides funding for wind energy technologies?

Funding provided by U.S. Department of Energy Office of Energy Efficiency and Renewable Energy Wind Energy Technologies Office. The views expressed in the article do not necessarily represent the views of the DOE or the U.S. Government.

What are the costs of a wind project?

Wind projects' costs include expenses other than turbines, like wind resource assessment and site analysis; construction; permitting and interconnection studies; utility system upgradation, transformers, protection and metering of the equipment; insurance; operations, warranty, maintenance, and repair; and legal and consultation fees.

How much does a reference wind system cost?

These two reference projects give a single-variable sensitivity range of \$76-\$234/MWh (see Slides 46 and 47). This range is primarily caused by the large variation in CapEx (\$3,000-\$9,187/kW) and project design life. The residential and commercial reference distributed wind system LCOE are estimated at \$240/MWh and \$174/MWh, respectively.
