How to configure energy storage batteries with solar panels

Overview

Can you add battery storage to a solar panel?

The good news is that it's entirely possible to add battery storage to an existing solar panel setup. So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options.

How do I Pair my solar panels with a battery storage system?

Let's break it down. Here's how to pair your solar panels with a battery storage system, step by step. Look at your utility bills. Figure out your average daily usage (in kWh). Consider any future appliances, EVs, or lifestyle changes. You want to produce more than you use. If your home uses 30 kWh/day, aim for 35-40 kWh/day from solar.
