How to configure solar and energy storage

Overview

What is energy storage?

Energy storage is a system that can help more effectively integrate solar into the energy landscape. Sometimes it is co-located with, or placed next to, a solar energy system, and sometimes the storage system stands alone.

Can solar energy be used for energy storage?

Solar power can be used to create new fuels that can be stored and later used to provide energy. Existing compressed air energy storage systems often use the released air as part of a natural gas power cycle to produce electricity.

Should solar energy be combined with storage technologies?

Coupling solar energy and storage technologies is one such case. The reason is that solar energy is not always produced at the time energy is needed most. Peak power usage often occurs on summer afternoons and evenings, when solar energy generation is falling.

Why is solar storage important?

Solar storage is important because it allows solar energy to contribute to the electricity supply even when the sun isn't shining. It also helps smooth out variations in solar energy flow on the grid, which are caused by changes in sunlight.

Why Energy Storage Configuration Isn't Just a "Battery in a Box" Imagine trying to charge your phone during a hurricane with a solar panel. That's essentially what modern grids ...

Solar Integration: Solar Energy and Storage Basics

What Is Energy Storage? Advantages of Combining Storage and Solar
Types of Energy Storage
Pumped-Storage
Hydropower
Electrochemical Storage
Thermal Energy Storage
Flywheel Storage
Compressed Air Storage
Solar Fuels
Virtual Storage
The most common type of energy storage in the power grid is pumped hydropower. But the storage technologies most frequently coupled with solar power plants are electrochemical storage (batteries) with PV plants and thermal storage (fluids)

with CSP plants. Other types of storage, such as compressed air storage and flywheels, may have different characteristics. See more on energy.gov/images of How to Configure Solar And Energy Storage
