How to install a container generator set

Overview

How do I prepare a facility for a generator set installation?

Place in prep area to ready to be located in facility. Preparing a facility for a generator set installation has a few additional steps. Setting up generator set mounting and auxiliary systems prior to installation can save system down time. Always consult federal, state and local authorities for regulations prior to beginning site preparation.

What is a containerized generator set?

() On a regular basis, containerized generator sets (CGS) are placed onboard ships to provide replacement power in case of damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers.

How do you install a generator on a building?

Contract a crane company to unload and position the generator. Use the gantry to place the generator set onto the pad. Cooling Air - Louvers installed on the building's exterior connected to the generator's radiator/aftercooler. Fuel System - Proper fuel line connections and transfer pump setup.

How should a generator set be properly installed?

Proper installation of the generator set is a precondition for normal operation. Using qualified spare parts for maintenance ensures good running condition and long life expectancy of the generator sets.
