Determine if there are legal restrictions for solar panel placement. Don't risk having to tear down your newly-installed solar panels because they run afoul of local municipal, building, or homeowner's codes. Before grabbing your drill, do your homework on where you can and cannot install solar panels. If you have a homeowner's association or live in a historic district, for instance, there may be restrictions on placing rooftop solar panels. Ground-mounted panels may need to be out of public view, or a certain distance from your property line. Installing solar panels may require a build.

If you love do-it-yourself projects, you may be interested in installing (or even) your own solar panels. However, unless you're a very skilled DIYer with ample experience in construction and electrical work, hire a professional installer to set up the.

Lay out the location of the roof stanchions on the shingles. Follow the installation guide for your to determine the correct spacing for the stanchions. Use a measuring tape and marking chalk to identify the position for each stanchion. It's vital that each stanchion is located directly above a roof rafter—rafters are the wood "ribs" that provide the shape and structural support for the roof. With some experience, you can locate roof rafters beneath the shingles, flashing, and sheathing by tapping a hammer and listening for the difference in sound. Otherwise, you can measure from protru.

Install a fixed ground mount for the lowest upfront cost. With a standard ground mount, a series of metal rods are driven into the ground to secure the panel structure in place. Concrete footings typically aren't required, which helps to reduce the cost and installation time. If you're interested in doing the job yourself, contact solar retailers to see if they sell DIY installation packages. Instead of using metal rods, another advanced DIY approach involves pouring concrete footings and attaching a framework of 4 in × 4 in (10 cm × 10 cm) dimensional lumber. Then, angle brackets are used to attach the panel supports an.
