# **Huawei Brazil Wind and Solar Energy Storage Project**

## Overview

---

Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

Why does Brazil conduct solar power auctions?

Brazil typically conducts auctions to secure power capacity for periods when demand peaks but supply diminishes, such as late afternoons – a time when solar power production declines. The June 2025 auction, exclusively for batteries and storage systems, is the first time the government allows such technologies to participate.

Will Brazil's energy auction improve power grid reliability?

Interest in the auction has been expressed by power companies such as Portugal's EDP and Brazil's ISA Energia. The auction will enhance Brazil's power grid reliability by integrating energy storage solutions for electricity generated from renewable sources such as wind and solar. US Tariffs are shifting - will you react or anticipate?

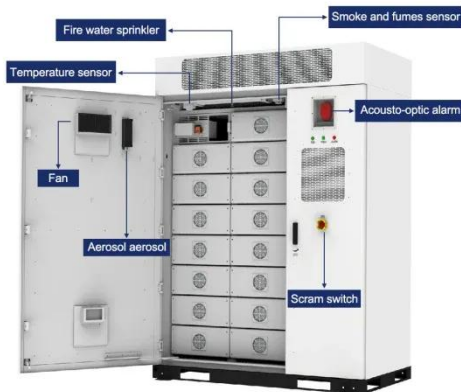

.

How will the solar PV and energy storage industry evolve?

The solar PV and energy storage industries will develop rapidly, expanding from a few countries to the entire world. Utility-scale power plants achieve economies of scale, reduce unit energy costs, and improve energy utilization through centralized management and optimized energy configuration.
