

BLINK SOLAR

Huawei Flow Battery Factory

Our Lifepo4 batteries can be connected in parallels and in series for larger capacity and voltage.

Overview

Does Huawei make power batteries?

While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials. Earlier in 2025, the company filed a separate patent on the synthesis of sulfide electrolytes — a key material known for its high conductivity but also high cost, sometimes exceeding the price of gold.

Who is Huawei power supply technology?

Zhangzhou Huawei Power Supply Technology Co., Ltd. is a globally renowned battery manufacturer and power solutions provider, specializing in motorcycle batteries, E-bike batteries, industrial batteries and storage batteries. With over 28 years of expertise in battery technology, we serve customers in more than 140 countries around the world.

What are Huawei's intelligent lithium battery solutions?

Huawei's intelligent lithium battery solutions provide dynamic peak shifting, transforming traditional backup power systems into efficient energy storage solutions that enhance system flexibility and reliability.

Why is Huawei developing a solid-state battery?

Huawei's design aims to boost safety and cycle life by mitigating degradation at this critical junction. Huawei's involvement in solid-state battery research reflects a broader trend among Chinese technology and automotive companies. While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials.
