Hungary s 5G base station speed is very slow

Overview

How fast is 5G in Europe?

The European region also lagged behind its peers in performance, with the median European consumer experiencing 5G SA download speeds of 221.17 Mbps—lower than those in the Americas (384.42 Mbps) and both Developed (237.04 Mbps) and Emerging (259.73 Mbps) Asia Pacific.

Which countries have the poorest 5G SA availability and performance?

According to a new joint study from Omdia and Ookla, Europe has had the poorest 5G SA availability and performance among major regions. In Q4 2024, China (80%), India (52%), and the United States (24%) led the world in 5G SA availability based on Speedtest® sample share, markedly ahead of Europe (2%).

Why is my 5G upload speed so slow?

This issue is particularly common when it comes to upload speeds. Many mobile networks will limit your 5G upload speeds to just 10-15 Mbit/s, even though the network is capable of much faster. To fix this issue, you'll either have to buy a more expensive data plan, or change to a different mobile network.

Does 5G slow down data speeds?

You can definitely experience a slowdown as your 5G connection switches to a slower (but stronger) signal. Your carrier could also have a hand in slowing down your 5G data speeds. Many plans—even “unlimited” ones—set specific data thresholds.

Hungary's 5G base station speed is very slow

Why Is My 5G So Slow? How To Fix Bad 5G Speeds & Signal

You Aren'T Actually Connected to 5G Your Speeds Are Limited by Your Mobile Network You Are Getting Patchy 5G Signal You'Re Suffering from Signal interference The Local 5G Network Is Congested Although this issue is more common with 4G compared to 5G, it's also possible that the mobile network is sometimes congested, resulting in slower download speeds. When too many people get online at the same time, the 5G network won't be able to cope, resulting in slower speeds for all users. This is particularly likely to happen: 1. During peak hou See more on broadband4europe phoneclinic
