# Indonesia s new energy storage companies

## Overview

---

Will Indonesia build a battery energy storage system by 2022?

The agreement was made with other state-owned bodies, such as the Indonesian Battery Corporation, to build the Battery Energy Storage System by 2022. However, no information has yet been revealed about the Battery Energy Storage System's location or specific functions.

Does Indonesia need a solar energy storage system?

As Southeast Asia's largest economy, Indonesia aims to source 23% of its energy from renewables by 2025, with plans to escalate this ratio by 2050. Energy storage systems (ESS) are critical to stabilizing the nation's grid and enabling seamless integration of solar power.

Why do Indonesians need energy storage?

Indonesia's focus on industrial growth creates a demand for reliable power. BESS can offer backup power, improve power quality, and enable cost savings through peak shaving. The Indonesian government recognizes the importance of energy storage.

Can EVE Energy solve power supply shortages in Indonesia?

To address the electricity demand in remote areas and islands across Indonesia, EVE Energy launched its 10 kWh wall-mounted residential ESS system and 25 kWh high-voltage stackable residential ESS system overseas for the first time. These solutions could resolve power supply shortages and help users utilize self-generated electricity.
