Installation instructions for battery UPS for solar container communication stations

Overview

How to install UPS & battery cabinet?

1. Installation sequence is as follows: 1.1 First, determine the installation location of the UPS and battery cabinet upon arrival at the site. 1.2. Install the battery connection Wires.

How to connect a UPS battery to a host?

F. Before connecting the battery cables from the battery cabinet to the host, measure the battery voltage with a multimeter, which should be 103.36V, and check if the positive and negative leads are correctly connected. If there is a battery box, connect the batteries in series and link them to the host as required. 2. UPS Battery Wiring Example A.

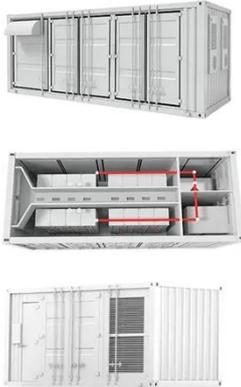

How to install a ups power supply?

The most important aspect of installing a UPS power supply is connecting the batteries. The key to connecting the batteries is to link the positive terminal to the negative terminal, connecting each battery in series, and then leading out two power cables, one positive and one negative, to connect to the air switch. C.

What size wire do I need for a UPS battery?

UPS Battery Wiring Example A. For a 10KW UPS, 6-square copper wires are recommended; for those below 10KW, 4-square copper wires are preferable. B. The most important aspect of installing a UPS power supply is connecting the batteries.
