Invest in micro inverters

Overview

Why is the micro inverter market growing?

The market is experiencing steady growth, driven by the rising adoption of rooftop solar systems and the increasing emphasis on maximizing energy efficiency. North America held the largest revenue share of 37.74% in the global micro inverter market. The micro inverter market in the U.S. is experiencing strong momentum.

How big is the micro inverter market?

The micro inverter market size reached USD 1.65 billion in 2023. The micro inverter market is driven by a greater need for monitoring at the module level. North America dominated micro inverter market in 2024.

Who are the leading companies in the micro inverter market?

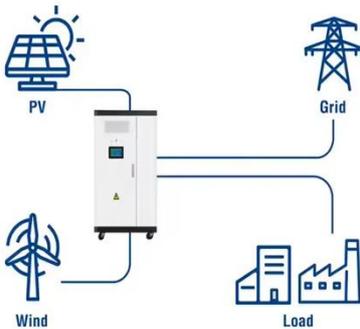

Some key players operating in the market are Enphase, Darfon Electronics Corporation, Deye Inverter, Sparq Systems, Fimer Group, Solis Solar, Tata Power Solar, and others. The following are the leading companies in the micro inverter market. These companies collectively hold the largest market share and dictate industry trends.

How much is the global micro-inverter market worth?

[204 Pages Report] The global micro-inverter market was valued at USD 4.9 billion in 2024 and is estimated to reach USD 14.5 billion by 2029, registering a CAGR of 24.1% during the forecast period. Government subsidies, incentives, and renewable energy adoption have driven the demand for micro-inverters.
